Replace the bracketed developer and contact details before publishing this policy online or submitting it with your App Store listing.

1. Overview

This Privacy Policy explains how Hamu Race ("we", "us", or "our") handles information when you use the Hamu Race mobile game. Hamu Race is a cute endless running game where a hamster runs, collects nuts, and the speed increases as the run continues.

This policy reflects the current version of Hamu Race as of the effective date above. It is written for a simple offline game experience with no account creation, no advertising SDKs, no third-party analytics SDKs, no online multiplayer, and no location-based features.

2. Quick Privacy Summary

- Hamu Race does not require users to create an account.
- Hamu Race does not ask for your name, email address, phone number, contacts, photos, precise location, or advertising identifier.
- Hamu Race does not sell personal information.
- Hamu Race does not use third-party advertising or tracking SDKs in the current version.
- Gameplay information, such as scores or settings, is stored locally on your device if used by the app.

3. Information We Collect

We do not collect personal information through Hamu Race. The app does not require registration, login, user profiles, social features, or user-generated content.

We do not knowingly collect sensitive personal information, including health information, financial information, government identification numbers, contacts, photos, camera data, microphone data, or precise location.

4. Local Game Data

Hamu Race may store limited gameplay data locally on your device so the game can work properly and remember your progress. This may include items such as:

- high score or best distance;

- total nuts collected or similar game counters;
- basic settings, such as sound or music preferences; and
- game state needed to start, restart, pause, or continue gameplay.

This local gameplay data stays on your device and is not sent to us. You can remove local gameplay data by deleting Hamu Race from your device. If iOS or a future app version provides a separate reset option, you may also use that option to clear local data.

5. Device Permissions

The current version of Hamu Race does not need access to your camera, microphone, photo library, contacts, calendar, reminders, Bluetooth, or precise location. If a future version adds an optional feature that needs a device permission, the app will request permission through the standard iOS permission prompt, and this policy will be updated to explain that use.

6. Third-Party Services

The current version of Hamu Race does not include third-party advertising SDKs, third-party analytics SDKs, social login, or third-party tracking tools.

Apple may process information related to App Store downloads, purchases, subscriptions, refunds, crash diagnostics, and device-level services under Apple's own privacy practices. We do not receive your Apple account password, payment card details, or other Apple ID credentials.

7. Analytics, Crash Reports, and Diagnostics

We do not include our own analytics SDK or crash reporting SDK in the current version of Hamu Race.

Depending on your Apple device settings, Apple may provide developers with aggregated or limited diagnostic information, such as crash logs, to help improve app stability. If we receive this type of diagnostic information, we use it only to fix bugs, improve performance, and make the game more reliable. We do not use diagnostic information to identify you personally.

8. Children's Privacy

Hamu Race may appeal to a general audience, including younger players. We do not knowingly collect personal information from children. The app does not ask children to create an account, enter personal details, post content, or share location.

If you are a parent or guardian and believe that a child has sent personal information to us outside the app, such as through a support email, please contact us. We will review the request and delete the information when appropriate.

9. Support Messages and Feedback

If you contact us for support, bug reports, feedback, or other questions, we may receive your email address and any information you choose to include in your message. We use this information only to respond to you, provide support, understand reported issues, and improve Hamu Race.

We do not use support messages for advertising, and we do not add support contacts to a marketing list unless you clearly choose to receive that type of communication. We keep support messages only as long as reasonably needed for support, recordkeeping, or legal purposes.

10. Data Sharing, Sale, and Tracking

We do not sell personal information. We do not share personal information with advertisers, data brokers, or third-party tracking networks.

Because Hamu Race does not collect personal information through the app in the current version, we generally do not have app-collected personal information to disclose. We may disclose information if required by law, to respond to valid legal requests, or to protect our rights, users, or the security of the app.

11. Data Security

We design Hamu Race to minimize data collection. Since the current version does not collect personal information through the app or store personal information on our servers, privacy risk is reduced.

No app, device, or method of electronic storage can be guaranteed to be completely secure. You should download Hamu Race only from official sources, keep your device updated, and use the security settings available on your device.

12. Your Choices

You can use Hamu Race without creating an account and without providing personal information in the app. You may also:

- delete the app to remove local gameplay data stored by the app;
- adjust device-level privacy and diagnostic sharing settings in iOS;
- choose not to send optional support emails or feedback; and
- contact us to request deletion of support messages that you previously sent to us, where applicable.

13. Future Features

If a future version of Hamu Race adds features such as advertising, analytics, Game Center, leaderboards, cloud saves, in-app purchases, push notifications, online multiplayer, account creation, or other services that involve data collection, we will update this Privacy Policy and update the app privacy information shown in App Store Connect as needed.

14. Changes to This Privacy Policy

We may update this Privacy Policy from time to time. When we make changes, we will update the "Last updated" date at the top of this document. Continued use of Hamu Race after a policy update means the updated policy applies to your use of the app, to the extent permitted by applicable law.

15. Contact Us

If you have questions about this Privacy Policy or how Hamu Race handles privacy, please contact us:

- Developer: Muhe Chang
- Website or Contact Us: <https://mia6855-cmd.github.io/hamu-landing/>

Note: This document is a practical privacy policy template for the described version of Hamu Race and is not a substitute for legal advice. Update it if your app uses ads, analytics, Game Center, cloud storage, user accounts, subscriptions, or any third-party SDK that collects data.
